

Dear Parents and Campers,

In an effort to ensure the longevity of camp we invited in some advisors to look at our financial situation and come up with a plan. We as a board have made efforts to cut costs, but we also did some assessment of how much camp actually costs. During the time that we are training staff through the time camps are being run, a weeklong camp experience is costing camp \$335. At the time of writing this for the brochure, the board is still contemplating what we will charge for camp, recognizing that this will be a big financial jump for some weeks. I know this has impact on families and churches, but inaction on our part will have a lasting impact as well. We hope that churches can help take on some of the burden through scholarships and fundraisers, maybe there are some camp supporters out there who would help with a scholarships fund. We want to try and help people get to camp and not have funds get in the way. However this is a step camp has to take to continue. We are still committed to offering you and your family the best experience possible at camp. Our desire is to connect people to Jesus and take steps in their journey of faith. We recognize the long history of how important camp is in that process, and look forward to what God has in store for you or your camper this summer as they witness the faith of the staff, engage in studying their bibles and hearing speakers bring the Word to life.
